Welcome to the 2019 Matrix Catalogue. It’s packed with brand new products as well as the extremely popular products that remain within the Matrix range. We’ve striven once again over the past 12 months, to design and produce fresh and innovative new tackle to not only look great, but also catch you more fish.

All of the Matrix products are designed with the help of our dedicated development team with heavy involvement from some of the best anglers across Europe. When you’re on the bank with Matrix products you can be safe in the knowledge that they’ve been produced using the highest quality materials available and the very latest manufacturing processes. All new products go through a vigorous testing process with our team of European consultants that gives us the confidence that each and every component will perform at the very highest level.

With so many new items over the next 76 pages it’s impossible to highlight them all, but we’re sure that whatever style of fishing you enjoy there’ll be an abundance of new products within the catalogue that will find their way onto your wish list.
The S36 Superbox continues to be the best value box on the market and following the introduction of the Blue and Black versions for 2018 we’ve seen it become even more sought after. With the popularity of both the S36 & S25 Lime being so high, for 2019 we’ve introduced the new P25 & F25 in the same stylish lime as the Superboxes.

All our boxes are built on the same modular system that allows you to upgrade your existing Matrix Seatbox easily and affordably.
Solid and stylish is the best way to describe the S36 Superbox. If you’re looking for a reliable seatbox that’s not only incredibly stable, but also has looks that far exceed its price tag then the S36 Superbox should certainly be on your radar.

SEATBOX ACCESSORIES

Designed and developed over two years to offer the most adaptable range of seatbox accessories. The 3D-R concept is built around a main knuckle which has a unique push-button, quick release system so items can be interchanged between the main block. The system also includes a quick-release thread which can be fitted onto products like rod rests, butt rests and pole socks eliminating having to screw them in position. This range features original 3D inserts, but with enlarged moulded knuckle blocks for increased durability and oversized ergonomic anti snag handwheels. Designed to fit 25mm, 30mm and 36mm round legs.

INSERTS

All 3D accessories come with 25mm and 30mm inserts enabling them to be used on 25mm, 30mm and 36mm round legs.

Matrix Poles are sure to be the big talking point for 2019 as we launch two new ranges. The brand new MTX Pole range has been launched after two years of development and offers unrivalled performance. The range offers two sub-categories of poles. MTX Ultra and MTX Power have been specifically developed to cover all pole fishing styles. All MTX Poles are built on the same mandrel to make all sections and top kits interchangeable giving the angler full flexibility to their required package.
MTX4 ULTRA POLES

MTX4 ULTRA

Developed to offer unrivalled performance, the MTX Ultra 4 incorporates the perfect balance between strength and rigidity to create a pole that can handle the rigours of modern day commercial fishing, whilst still remaining ultra-responsive. Manufactured using the highest quality Japanese carbon and high impact resin to offer unrivalled strength and rigidity.
MTX4 ULTRA 16M

- Superb performance and balance
- Built on the same mandrel as the original Nemesis poles
- Features MST – Multi Strand Technology
- Exclusive Glide anti-friction taped sections
- All joints are reinforced with 1K carbon weave
- Section alignment decal system
- Generous kit package

Developed with a super lightweight construction combined with ultimate winding power. The new Horizon X reels use a carbon reinforced body which creates a rigid casing, minimising flex whilst keeping weight as low as possible. Extensive testing has helped to develop the multi-disc front drag system, combined with the sealed bearings this offers ultra-smooth performance. Each sized reel has been specifically developed so the body, rotor and handle are balance, whilst all sizes feature a slightly enlarged spool which enhances casting and minimises line bedding. Available in three sizes: 3000, 4000, 5000.

### Horizon X Reels

Over the past 12 months Matrix Accessories have certainly grabbed people’s attention. The launch of the ground breaking SLIK elastic had the whole industry talking as did the new additions to our feeder range. The Bell Feeders started the ball rolling with their unique design and manufacturing process which was then used in the development of the new Horizon XD Feeders. On top of that, the updates to our commercial feeders saw the introduction of two new alloy models regarded by many as the best on the market. There’s plenty to get excited about over the coming pages!
Our best ever Method feeders! Available in a range of sizes and weights, the range will cover all of your Method feeder needs. They’re packed with features, including a new interchangeable system, removable plinth and a newly designed Quick Bead.

**ALLOY METHOD FEEDERS**
- Available in 6 sizes: Small 15g & 25g, Medium 30g & 40g, Large 30g & 45g

The elasticated tubes have been designed to be used in conjunction with the Matrix Method Feeders and Open Method Feeders. The interchangeable system allows the feeders to be changed with ease, without removing the Elasticated Tube.

**ELASTICATED FEEDER TUBES**
- Developed to work in conjunction with the new interchangeable system
- Available in 2 sizes medium & large
- Assembled using high quality hollow elastic
- Designed to eliminate hook pulls
- Coated O-rings to prevent corrosion
- 2 tubes per pack
- MEDIUM - GFR187 £2.49
- LARGE - GFR188 £2.49
**SQUEEZE AND FEED METHOD MOULD**

The Squeeze and Feed Method Moulds are available in three sizes and are designed to work with all of the Evolution Method Feeders (both In-Line and Elasticated). We have designed the moulds to be deeper than other versions on the market, which allows you to use more bait on the feeder should you want to. This extra depth also provides more movement, for solid compression when loading a feeder. The mould couldn’t be easier to use and works perfectly with both groundbait and softened pellets. Simply place your hookbait into the mould and then fill it with the groundbait or damp pellets of your choice. Push the feeder face down into the mould, turn the mould over and squeeze both sides. The Method feeder will release from the mould perfectly loaded, with the hookbait on top and ready for casting.

**METHOD FEEDER MOULD**

- For use with all Matrix Method Feeders
- Also works with many other flat Method Feeders
- Deep design lets you load up the Method Feeder with more bait than normal moulds if you want
- Soft malleable material for easy release of feeder
- Available in 3 sizes
  - SMALL - GFR123 £3.25
  - MEDIUM - GFR050 £3.49
  - LARGE - GFR061 £3.99

**HOW TO LOAD A METHOD FEEDER**

1. Place your chosen hookbait into the bottom of the Squeeze and Feed mould.
2. Add your chosen groundbait and/or dampened pellets into the mould.
3. Fill the mould to the top and push your feeder face down into the free feed.
4. Turn the mould upside down, give the sides a squeeze and you’re ready for action!

MICRO BAGGING WAGGLER LOADED
- A crystal pellet waggler, but with the addition of a feeder cage at base for moulding groundbait and pellets
- Clear body reduces chances of fish spooking
- Cage enables steady stream of feed to fall around hookbait
- Ideal when a large amount of feed is required
- MEDIUM • GAC317 £3.75
- LARGE • GAC318 £3.75

PELLET WAGGLER LOADED
- Loaded crystal pellet waggler perfect for catching fish up in the water
- Clear body reduces chances of fish becoming spooked
- Pre-loaded weights ensure float can cock without adding extra shot
- Weights can be removed should you wish to change setup of float
- Can be converted into Micro Bagging Waggler by adding Pellet Waggler Feeder Cage which is available separately
- 8mm available in 4g, 6g and 8g
- 10mm available in 6g, 8g and 10g
- High visibility top makes seeing bites very easy
- 8MM 4G • GAC311 £3.25
- 8MM 6G • GAC312 £3.25
- 8MM 8G • GAC313 £3.25

- 10MM 10G • GAC316 £3.25

PELLET WAGGLER ATTACHMENTS
- Handy attachment for use with Matrix Pellet Waggler and Bagging Wagglers
- Allows for quick and easy changing of waggler without breaking line down
- Supplied with multiple float stops to prevent float from slipping on cast
- Stops and attachment supplied on wire loop for easy transfer onto mainline
- 5 clips and 20 stops per packet
- GAC331 £2.25

IMPACT PENCIL BAGGING WAGGLER
- Available in two sizes: 10g medium and 15g large
- Highly visible
- Adjustable loading capacity
- Removable feeder
- Perfect for shallow fishing or fishing against islands
- Extra buoyancy aids self hooking
- Ideal when a large amount of feed is required
- MEDIUM • GAC345 £3.75
- LARGE • GAC346 £3.75

IMPACT BAGGING WAGGLER
- New, modern take on classic bagging waggler design
- Unique design prevents it from plunging underwater on impact
- Bulbs top hooks fish before you strike
- It’s high visibility orange top makes very easy to see bites
- Perfect for catching species such as carp up in the water
- Features cage on base around which groundbait and pellets can be moulded
- Cage enables steady stream of feed to fall around hookbait
- Allows you to turn swim ‘upside down’
- Great for fishing tight to islands when you’re getting false indications on a Method Feeder
- GAC339 £3.75
