With a range of versatile rods, innovative accessories and luggage, the world’s first carbon seat box and award-winning poles, MAP has cemented its place as a brand for all anglers who want high-performance, match-focussed tackle.
TKS Introduction

Now in its third generation of poles, TKS has proven to be a huge success because of the way that regardless of budget, any angler can buy into as enjoy its benefits. From budget poles through to flagship offerings such as the 1001, we’re proud to be providing poles that stand the test of time because of their versatility. Add in the option of purchasing spares that are universal across the range and it’s clear to see why TKS is the pole system of choice for 1,000s of anglers across the UK.

Whatever TKS pole you buy, you can rest assured that there will be top kits to suit your needs. With a universal design that sees ALL our kits fit ALL of our poles, performance is never compromised thanks to the highest grade of carbons and features like reinforcement bands and pre-fitted pure PTFE bushes. With a choice of power, match and F1 Shalla kits, no matter how you fish there’s a top kit to fit your pole and for that matter, any TKS pole ever produced.

Fusion
A process that bonds two different grades of carbon together enabling us to develop lighter, stronger and more rigid poles. This process is used on all models.

Bi-Lateral Joint Reinforcement
A 3K carbon weave added to both the male and female joints to reinforce them and prevent wear, and joints sticking together in wet weather.

Matrix High Impact Resin
Matrix Resins are proven to increase the strength, toughness and the durability of composites whilst also reducing the overall weight. Matrix Resins are used in the production of all TKS poles.

MTM Carbon
All materials used in the production of TKS poles are purchased from the one of the world’s largest carbon manufacturers – Toray in Japan.

Elastic Ratings
Each TKS pole has been designed here in the UK, so you can be assured they can withstand the elastic rating we put on each model.

Smooth Ship Finish
This is an anti-friction finish that’s added to each TKS model to ensure smooth shipping when fishing. It also prevents your hands sticking to the pole whilst wet.
TKS 901 3G 16.0M

£3,500.00

The TKS 901 was ground-breaking, but we have pushed those ground-breaking boundaries even further with the new TKS 1001. Using a totally new mandrel, along with exclusive Japanese carbon and resins, we have developed not only the stiffest 16m pole on the market (it’s even stiffer than the 901) but at the same time developed the slimmest 16.0m on the market, measuring an incredible 43mm at 16.0m butt. And finally, we have managed to make this pole 35% stronger than the 901, making this pole possibly the best pole ever produced. Top kits are shorter without effecting the poles overall length and feature a unique depth marker print, so you can quickly find the correct amount of depth you require, or know what depth you were actually fishing at.

Spares package includes:
- 1 x Pre-Bushed Depth Marker (V3) Match Kit fitted
- 4 x Pre-Bushed Depth Marker (V3) Power Kits
- 7 x Pre-Bushed Depth Marker (V3) Match Kits
- 2 x Short / Shallow One-Piece Kits White
- 3 x Short Number 3 Sections
- 1 x Extra Rigid Cupping Kit and Cups
- 1 x Reinforced Mini Extension
- 1 x Deluxe Pole Holdall

Features include:
- Anti-Friction finish throughout
- Understated lightweight graphics
- Side pullers fitted on all kits
- PTFE bushes fitted on all kits
- Unique depth markers on all kits
- Section alignment system
- Reinforced Joints
- Elastic Rating 20
